

ENHANCE YOUR EXPORT-IMPORT PROCESS WITH **nEXIM**

SAP EXIM Solution

Trading and transacting in international markets need an array of statutory, logistics and financial documents. Complying with rules, regulations and local laws of International Trade is of utmost importance for companies engaged in the International Trade.

The SAP EXIM supports various business transactions and legal compliance processes that are unique to the region. It includes the letter of credit and bank guarantee functionalities such as the ability to create an outgoing letter of credit and it's receipt from bank, receipt of incoming letter of credit, creation of outgoing bank guarantee and it's receipt and receipt of incoming bank guarantee.

nEXIM Solution From Applexus

nEXIM, co-innovated with SAP, is an add-on solution to the SAP EXIM for import and export localization in the Middle East and North African (MENA) region. It enables EXIM to handle documentation, financial transactions and critical operations in the trade process. It brings in additional features & flexibility in the areas of Letter of Credit process and Bank Guarantee.

nEXIM follows the design/look and feel of the SAP EXIM screens to give the user a seamless experience. Additional reporting features enhance user experience significantly. NeXim is tightly integrated with the SAP Finance and Logistics modules.

nEXIM is tightly integrated with the SAP Finance and Logistics modules.
